

My thanks you the joint show team & Show Managers Hehir & Byrne . whom I understand in the eyes of some have become sisters, amazing Irish hospitality, superb hotel & wonderful dinner not to forget the Lunch & snacks throughout the day, at the show, the caterers did you proud, but then I am always delighted to have sweets during the show, extra special thanks to Deborah Newman my grateful thanks fortravelling over to Ireland to lift some of our heavyweight charges from their pens, the honour was truly mine & very much appreciated, nobody could have been more valuable. I would due also like to comment on how well prepared the vast majority of SLH exhibits were, whilst still the odd one requiring more in the Maine(intentional pun) the presentation was splendid, those that were not will be commented on likewise so will some of those that were in a more (positive manor). Thank you also for the useful gift. Brief reports due to the numbers. I'm afraid.

#### Section 4 .

**Ex 1. HARTE'S. SHALNAVAZZ NIMOO LYS n.** 15-11- 24 . Black Lykoi I will elaborate on this exhibit as my wrist was playing up badly by the time I got round to writing the report & as a result the written report was very brief, I did speak with the exhibitors to explain the situation. he is well worth progressing with. He has the most roaning I have ever seen that said, like the majority of our judges nobody has seen that many to be called an expert on the breed. As such the breeder is possibly the best source of information. Currently his ratios are not well balanced, requiring more, black his are at present predominantly white but he is also very young I understand almost in a state of constant moult. I would prefer his eyes a little larger, colour still in process of developing, possibly not helped as he is teething badly at present with his teeth a little overcrowded, chin okay Lithe elegant body of moderate foreign build, slender limbs, with long toes , moderately large ears wide at their base. the coat is beautifully soft & semi-transparent, parting easily to the skin, face could be a little balder ideally but may well become more so with development. Balanced length tapering tail, He does appear to be a good example, but requires more development. Coat length uneven at present, longer over his lower back. According to his evaluation slip his DOB is 15-10-25, in which case he has not yet been born, clearly incorrect ,I did check be sure .

#### Section 4 Hibernian, Gr Pr , Male:

**87.hiberniam not Awarded MCKENZIE'S. GR PR DADDYO TALKIE TOASTER DRX b.** 14-09-21. Chocolate Devon Rex, rather chunky chap no neck & as a result lacks elegance, looking rather coarse & heavy.as such aiming a little too high in the title stakes for me. Head is a little too long with no stop. His coat a mite shaggy & could be softer & very much closer lying to create a sleeker appearance

#### Section 5 Hibernian, Gr Pr , Male:

**94. SLUITERS'S GR PR SLIABH GINHIROYUKI BUR c** 30-05-20 `Lilac Burmese, after a degree of deliberation as he is over his best weight but the coat was superb. His type is very

good, firm chin bite okay, marred a little by the bump on the nose ears are set well, eyes still retain yellow chartreuse colour quite a pleasing shape & set, bit overweight, good tail. head on very pleasing his superb tight fitting sleek satin like coat tipped the balance, colour could be warmer.

#### **4b Premier Female:**

**89 . Gr Not Awarded HARTE'S PR DESHIBLLES KITTY GALORE SPH a 03.** 18-05-23. Blue Bi-Colour. There was much I liked about this girl. She has super lemon drop eye shape, angular ear set, quite large, slight angle in profile, chin okay, good bite. Lithe firm body which though not large was firm. Well-proportioned limbs, long toes. tip-toe stance. Long tail, free of excess coat which sadly drew to attention some scarring & was my reason not to award, it is after all a beauty contest .

#### **Devon Rex Neuter, Male**

**MCKENZIE'S. GR PR DADDYO TALKIE TOASTER DRX b.** 14-09-21. Chocolate(see above)

#### **Devon Rex Neuter, Female;**

**Pr & 1<sup>st</sup> not awarded 2 LEIVISHINA IRIS VON GABORLAND DRX n 03 22.** 23-04-21 Black /Brown Classic Tabby & White. This girl was rather clumpy, small ears require more flared wide base Too full rounded in the eye shape., though bright as no points for colour, I'll omit comment though they were bright, her coat was dense but a mite harsh & almost padded as opposed to soft & fine, very thick & well covered but not correct, she was lacking evidence of being elegant being heavy & rounded, tail could be longer & finer. No stop, good depth chin, level bite.

#### **Sphynx Neuter;**

**89 BOB Considered for BOB Not Awarded.1<sup>st</sup> HARTE'S PR DESHABILLES KITTY GALORE SPH a 03.** 18-05-23. Blue Bi-Colour. This was long in the head & required more rounding to the contours , his biggest problem for me he is harrier than ideal for a Sphynx, whilst I would like him more like the girl to create a chamois effect, White on both ear tips Some pinch, chin & bite both okay, some gingivitis, patchy over the neck & back. on

#### **Asian S/H Tabby**

**91. REDMOND'S. JOYEUX JEWEL ASH f 25.** 28-03-24. Black/Brown Ticked Tortie Tabby, good chin & bite, darker pigmented rims to her eyes, Ears set well, noy by any means a big girl, being quite petite , albeit well proportioned, short sleek satiny coat, as a Tortie she is beautifully marked. With lots of rich reds, beautifully ticked. Well defined heels, bit agitated but deigned to be fully examined .

#### **Brown Burmese Neuter Male:**

**92. MCCARTHY'S JOYEUX CRONAN.** 30-04-24. I really liked this lad, but he was a tad naughty. As a result I had to mark him as WNH, sadly he looked to be the better of the two

#### **Brown Burmese Neuter Female:**

**93. 1 CC & BOB REDMOND'S SLIABH GAMILLA PRISCILLA** 26-04-18.by comparison she was a real pussycat , short , blunt wedge, rounded top, good chin & bite, ears wide apart touch of tilt round tips her eyes though well shaped could be more curved on the lower line

ideally, colour the greener spectrum of chartreuse . Firm body, Sleek polished coat, splendid texture.

#### **Lilac Burmese Neuter:**

**94. SLUITERS'S GR PR SLIABH GINHIROYUKI BUR c** 30-05-20 ( see above)

#### **Asian SH Variant**

**96 CC z& BOB . FRENCH'S TEMPLEBAR FABULOUS THUNDERBIRD. ASH n 31** . 08-07-23 effectively a Brown Burmese with the wrong parents , good chin, level bite. Confession time I went for this over the other as though a little between the type was more typical, plus this is my first encounter at a show of this pattern variation, chin & bite good.

**2<sup>nd</sup> 95 SHACKLETON'S TEMPLEBAR FUN BOY ASH n 31.** 08-07-23, good chin, level bite. Ears are set well apart, well-shaped eyes, not dissimilar in type to his litter mate, sleek coat. Even rich brown. Wonderful nature. Interesting to meet up if still a mite controversial

#### **GCCFI Support Dublin**

##### **Section 2 Hiberian GR PR Male:`**

**11 HIBERNIAN STIENER -BROWNE'S GR CH FRIENDLYGHOSTS BIG BEAR MCO n 22** 19-05 - 22, Brown Classic Tabby Maine Coon. Magnificent & ran me really close for best section 2 exhibit. Super head wonderful chin & bite square muzzle high cheeks. He really is most impressive, wonderful type. Coat colour & pattern he was almost the complete package & is certainly close. `

**21RES N/A 2. SWIACKA'S INT GR CH CATTACAMON VOLTURIAN MCO ds 11** 24-02-22. ed `Silver Shaded Maine Coon. Apologies but no comparison between these two chaps as a result I could not justify a Res it may have implied they ran each other close which was not the case . longer tufted ears, though not unduly excessive, some pinch to the muzzle, deep strong chin, untidy bite. Amber obliquely set eyes. Muscular body well boned & prepped

##### **Section 2 Hibernian GR CH Female:**

**18 . HIBERNIAN WAGNER'S INT GR CH UNICUM TESLA MCO g 03 22.** 03-12-20.

Blue Tortie `Classic Tabby & White Maine Coon, White on all four paws, as was her bib. Small tufts on her ears which are well placed, green eyes. Pleasing size well open, round shape ,oblique setting. Super pattern, well distributed colours, Excellent `profile. With good chin & bite. well groomed.

**17 RES. WAGNER'S GR CH & INT CH FRIENDLYGHOST CHAIYYA CHAIYYA MCO g**

**22.** 24-04-22. Blue Tortie Classic Tabby Maine Coon. Pleasing girl these two ran each other close, the other girl a bit more mature giving her an advantage well boned. Strong profile, Chin & bite both good, her pattern is clearly visible, good length flowing tail , Coat is typically shorter over her shoulder area, shaggier tummy area

##### **2 c GR CH Male:**

**22. GR WAGNER'S SUP INT CH FREINDLYGHOST FALKOR MCO a** .23-05-23. Blue Maine Coon. 23-05-23 anther contender, who was so beautifully prepared possibly within an inch of his life, wonderfully long flowing tail that appeared to go on forever, strong ,masculine

head well defined cheeks for his relatively young age of not yet 2, long rectangular body, heavily boned, when it comes to prep he could be equalled but I doubt bettered, perfectly happy to lounge on our trolley for as long as possible. Literally not a hair out of place.

**10 RES SHACKLETONS INT CH ISHCUS NIGEL. MCO n 22.** 10-08-22, Brown Tabby Maine Muzzle does not possess the same level of strength as the winner, profile not his best feature, chin bite both good, it also has good width, tail furnishing could be better as this makes his tail appear thin, coat is uneven in length, reasonable Classic pattern, good larger ears, set well.

#### **2 c GR CH Female:**

**15. GR SWIACKA ‘, INT CH BLACKJAGUAR HOPE. MCO gs 03 23.** 01-05-23. Blue Tortie Silver Classic Tabby & White Maine Coon, for a girl she has impressive degree of squareness to her muzzle, high well-defined cheeks. , strong profile, excellent chin, level bite. though some gingivitis. her eyes are large, round shape & oblique setting. Good length body, well boned , good size paws, well-furnished tail. splendid pattern & rich tones to her colour, amber eye colour, beautifully balanced girl.

#### **2 c GR PR**

**33 GR N/A 1. SHACKLETON’S INT PR ISHCUS ROGER. MCO n 22.** 08-02-23. Brown Classic Tabby Maine Coon. Though his type is relatively good with good slightly narrow head , small rise on his nose. He is well groomed but sadly he is rather too solid & requires more silver ground colour to lift his pattern his leg markings facial striation are not so solid overall. His more solid colour combined with his nose bump narrowness of head determined my decision.

#### **Ragdoll With White adult**

**1 CC & BOB PSUIK’S LEIDERLAND OCTAVIA RAG n 04 21** 06-07-24 Seal Point ,Mitted both these girls require greater maturity I would like her better grown & to possess a wee bit more substance. Head was showing width across her cheeks. Flat brow gentle dip in profile slight retrousse effect to her nose, reasonable chin & good bite. I was expecting her to be weightier as her boning is good, I did think I could feel a little imperfection in her tail but then couldn’t find it again so decided to forgive, but it could well be present but I did not want to twiddle case it upset her good amount of coat & contrast between her tabby tracings white mitten , tiny flecks of white to her nose & brow perfectly acceptable. Good depth of eye colour.

**5 2 PHELAN’S MECOTE’S VENUS RAG n 03.** 11-04-23. Seal Bi-Colour, at almost 2 this girl needs to be better grown. Well prepared, medium size ears set well showing slight forward tilt. good profile, her eyes are well open though I would like more depth to the colour her coat was truly lovely, full knickerbockers good ruff, balanced inverted white blaze on her face, warm tonal seal on her body with white contrasting well against the darker more solid points colour,.

#### **NFO Adult Male:**

**7. 1<sup>st</sup> & CC MCCLLEND’S STRANGFORADR LORCAN MCUILL NFO as 09 22** 22-05-23. Blue Silver Tabby & White, triangular head shape, virtually straight profile, chin & bite both good. ears are moderately large the inner line following the lines of his chin, set quite high but not too close, he has beautiful eyes no points for their colour or indeed his colour or pattern so

now that is out of the way the shape is well defined & set obliquely spaced well apart, room for further growth. Coats were interesting both with double coats, though the boys was harsher . But his type not as showy as the girl but then he is young so may well continue to mature

**NFO Adult Female:**
